

Capability Statement

Company Data

Serving the nuclear industry since 1982, Energy Steel has the experience, equipment, and capacity to meet the growing demands of the nuclear power industry. With our modern manufacturing facilities in Rochester Hills, Michigan, we have the ability to complete the most complex nuclear safety-related projects.

Producing nuclear components requires a proper quality control program, along with specialized equipment and manufacturing experience. Our extensive capabilities allow us to provide custom solutions for a wide variety of mechanical components, on time and on budget.

Quality Standards

- ✔ Certifications: N, NPT, NA, NR, NS, U, R
- ✔ Canadian Z-299
